ERICA – White

External Release Internal Chain Access

What happens if, for whatever reason, the person inside the property cannot get to the door to release the chain?

Even when you have a key to the main lock, the security chain is acting as a steel barrier, preventing you access in the case of an emergency.

FIT ERICA. Standing for External Release Internal Chain Access, this unique product has been specifically designed and developed to provide the effective solution to this situation, without compromising the original security that the door chain provides.

BENEFITS:

- Modern Alternative To Door Safety Chain,
- Easy Operation Push Button Release,
- External Key Release,
- Suited Key Option - High Security Fixings,
- Simple Push In Chain Engagement, Chain Length Options
