Specification Sheet

Phoenix Fire Commander Range

Fire strikes without warning! To combat this ever-present threat, Phoenix has provided the ultimate in protection for irreplaceable company records and documents. In a furnace test, with the fire at an incredible 1122°C, the Phoenix Fire Commander safely protected its contents for over 3 hours!

In addition, our engineers have produced not only the finest ever protection against fire, but the cupboard is attractively designed. This pleasing design disguises a safe of colossal strength, which can withstand the crushing pressures of a building collapsing upon it during a fire.

The safe is locked with a user friendly, but high security digital electronic lock. The lock allows the user to programme their own personal code of easily remembered numbers, up to a maximum of 16 digits. The single door models 1901 and 1902 also have the advantage of a “slam action” automatic locking mechanism for emergency use.

The large capacity of the 1900 Series with internal capacities from 163 litres to a staggering 699 litres, is fitted with adjustable full width shelves and either one or two lockable steel drawer units.

Product Code	Information
1901	Internal 980mm x 475mm x 350mm External 1250mm x 655mm x 560mm Door Swing: 570mm/40mm Weight: 228Kg Capacity: 163 Litres 2 Shelves, 1 Drawer, Single Door
