Specification Sheet

Phoenix Firechief Range

The Phoenix Firechief sets new standards for protection against fire and burglary attack in an economic, convenient and attractive format.

- Provides 30 minutes fire protection for paper records.
- The safe is recommended for a cash risk of £2,000 or valuables risk of £20,000*.
- European security test rating of EN14450 (Security Level S1).
- High security 3 way espagnolette boltwork provides great strength and attack resistance.
- Fitted with a high security double bitted keylock. Optional electronic locking available on all models.
- Low weight and floor loading is achieved by use of advanced fire resistant materials.

YOU OWE IT TO YOUR COMPANY

When fire strikes, it's not just the premises it destroys, it will also engulf all the essential company paperwork stored inside them.

Unfortunately, the failure to preserve these vital records, only too often, destroys the company itself! In spite of the computer revolution, vast amounts of important data and records are still held on paper.

With an increase in fire hazards from electrical equipment, insurance statistics indicate that as many as 35% of companies will cease to exist within the first year after a major fire. It is therefore essential for survival that all your records are protected. From debtor records to payroll and pension fund data, from customer orders to product designs, all valuable and legal documents, deeds and contracts require protection. Don't forget by law you are required to protect hazardous chemicals and paints from theft and fire.

The answer to all of these problems is the Phoenix Firechief 1610 Series.

FIRE RESISTANT SECURITY CUPBOARDS

The combination of state of the art insulation materials and innovative design has led to the development of the Phoenix Firechief 1610 Series. Available in three sizes, our cupboards are robustly constructed with a 50mm fire gap between the inner and outer layers. This gap is filled with our specially developed system of multi-layered insulation materials to ensure the survival of your documentation.

The cupboards are fitted as standard with heavy duty, three way espagnolette boltwork and locked by a high security double bitted key lock. An optional electronic lock can also be factory fitted. All models are equipped with height adjustable shelves with optional lateral rails available.
